Professional Summary

Machine learning enthusiast with hands-on experience in deploying real-time applications and cloud-based solutions. Skilled in building intelligent systems using Python, Scikit-learn, and integrating ML models into scalable web platforms. Strong communicator with a passion for solving real-world problems through data-driven solutions and modern web technologies.

Education

GMR Institute of Technology , Rajam	2022 – Present
Btech in Information Technology	CGPA: 7.1
Vignan Jr Coperative College , Vadlamudi	2020 – 2022
Intermediate, MPC	78
ZPHS Inkollu , Inkollu	2020
SSC	81

Experience

VnurtureIT, Onsite June 2024 – July 2024

- Cleaned and transformed raw datasets using Power Query and DAX for efficient data modeling and reporting.
- Developed interactive Power BI dashboards to visualize key performance indicators (KPIs) for marketing and sales teams.
- Integrated Power BI reports with Excel and SharePoint to enhance data accessibility across teams.

Projects

AI-Powered Medical Chatbot for Mental Health Wellness 2025

React.js, Node.js, OpenAI API, MongoDB, Express.js, JWT, Tailwind CSS

- Developed an AI-driven chatbot to provide empathetic mental health support and basic self-care suggestions using OpenAI's language models.
- Integrated role-based login system with JWT authentication for secure and personalized user experiences.
- Stored user interactions and mental wellness history securely in MongoDB to enable personalized insights.
- Designed a responsive front-end using React.js and Tailwind CSS with smooth conversational UI/UX.
- Ensured ethical AI responses by implementing filters to redirect high-risk queries to professional help links.

Rainfall Prediction System 2024

Python, Scikit-learn, Pandas, NumPy, Matplotlib

- Built a machine learning model to predict rainfall levels using historical weather data.
- Preprocessed datasets using Pandas and handled missing values and feature scaling for accurate training.
- Trained and evaluated models such as Linear Regression, Decision Tree, and Random Forest to find the best-performing algorithm.
- Achieved prediction accuracy of over 85% using Random Forest and cross-validation techniques.
- Visualized key weather patterns and rainfall trends using Matplotlib and Seaborn for better interpretability.

Technical Skills

Languages: Python, Java, C

Frontend: HTML, CSS, JavaScript

DevOps/Tools: Git, GitHub, VS Code, Postman, Google Colab

CS Topics: Data Structures & Algorithms, OOP, OS, DBMS

Certifications

Web Dev: Java: Core Java Specialization

Generative AI: Introduction of Generative AI

Activities & Interests

Active contributor on GitHub and Kaggle. Passionate about applying machine learning to solve real-world problems, from predictive analytics to intelligent automation. Enjoy experimenting with ML models, participating in AI hackathons, and collaborating on open-source data science projects.
