Education

B.Tech (Artificial Intelligence and Data Science)	GMRIT Rajam, India	CGPA:7.3	2022{2026
Intermediate (MPC)	Vasavi Junior College Parvathipuram, India	Marks:798	2020{2022
SSC Z.P.H.S Kotipam, India		Marks:560	2019{2020

Internship Experience

AWS and DevOps Intern, Hashtek Solutions	Vizag, India	July 2025 { Nov 2025
- Implemented cloud-based deployments using AWS services such as EC2, S3, IAM, Load Balancer, and Auto Scaling. - Supported DevOps automation with CI/CD pipeline setup, Docker containerization, and Terraform infrastructure provisioning. - Improved system scalability and monitoring through AWS CloudWatch and Linux automation scripts. - Contributed to around 70% of overall project development and deployment processes during the internship period.		

Projects

Virtual Snake Game Tech Stack: OpenCV, Python, Mediapipe	Code	08-03-2025
- The main objective of this project is to control the snake game using hand gestures with OpenCV and MediaPipe, where hand movement directs the snake's path. - It provides an engaging real-time interface that detects hand movement to move the snake, eat food, and update the score dynamically.		
Virtual Scientific Calculator Tech Stack: OpenCV, Python, Mediapipe	Code	14-04-2025
- This project creates a gesture-controlled virtual calculator that performs mathematical operations using OpenCV and MediaPipe. - The calculator interface detects finger coordinates and allows users to perform arithmetic calculations in a virtual environment.		
Fake Job Postings Detection Tech Stack: Python, HTML, CSS, Flask	Code	19-05-2023
- Developed a machine learning model to detect fake job postings on online platforms using NLP techniques. - Achieved an accuracy of over 85%, improving reliability in identifying fraudulent job advertisements.		
Flight Price Prediction Tech Stack: Python, HTML, CSS, Flask	Code	28-07-2025
- Built a flight price prediction system using features like airline, route, date, and number of stops. - Implemented data preprocessing, visualization, and regression algorithms to accurately forecast ticket prices. - Achieved a prediction accuracy of over 88%, enhancing price forecasting reliability for different airlines.		

Skills

- Programming and CS fundamentals: Python, Java, Data Structures and Algorithms, Operating System, Database Management System, Computer Networks
- Technologies: Machine Learning, Natural Language Processing, Git
- Web and Databases: HTML, CSS, Flask, MySQL
- Tools: AWS, DevOps, Docker, Terraform, Linux
- Others: Excel, Communication, Collaboration, Teamwork

Achievements

- Solved over 200+ problems on GeeksforGeeks

Certifications

- Completed SQL (Basic and Intermediate) certification on GeeksforGeeks.
- Completed Introduction to Generative AI course on Coursera.
