PROFILE SUMMARY

Enthusiastic AI and ML learner dedicated to building intelligent, practical solutions through hands-on experience. Passionate about continuous growth and contributing to impactful, data-driven innovations that solve real-world problems.

EDUCATION

GMR Institute of Technology, Rajam, India

B.Tech CSE (AI & ML); GPA: 7.75

June 2022 – Present

Sri Chaitanya Junior College, Srikakulam, India

Senior Secondary; AP Board; GPA: 83.1%

June 2020–May 2022

SKILLS

Languages: C, Python, SQL, HTML, CSS, JavaScript

Frameworks/Libraries: Pandas, Numpy, Scikit-Learn, Matplotlib, TensorFlow, Flask

Tools: Git/GitHub, Jupyter Notebook, VS Code, Google Colab, Kaggle

Core Concepts: Data Structures & Algorithms (DSA), DBMS, OOPs, Machine Learning (ML), Deep Learning (DL)

Soft Skills: People Management, communication, Team Work

EXPERIENCE

VnurtureIT, Data Analyst Intern

June 2024 – July 2024

- Gained practical experience in leveraging Power BI, Tableau, and Looker Studio to transform complex datasets into clear visual reports and interactive dashboards.
- **Election Dashboard Project:** Developed an interactive analytics dashboard using Power BI to visualize voter demographics, party performance, and turnout trends; enabled data-driven insights through dynamic charts and region-based comparisons.

PROJECTS

Human Scream Detection Model

- Developed a real-time scream detection system using deep learning with 89% accuracy on live audio input.
- Integrated Telegram API to send instant alerts upon scream detection, enhancing emergency response capabilities.
- Utilized Flask for backend deployment and Librosa for audio feature extraction from microphone input.
- **Tech Stack:** Python, TensorFlow, Librosa, Flask, SoundDevice, Telegram API

Weather Forecasting Web App

- Built a web-based ML app using Flask and Weather API to provide 5-day forecasts with real-time location input.
- Trained a regression model on 20K+ records, achieving 93% accuracy and 1.8°C MAE for temperature prediction.
- Deployed responsive UI with <2s response time, visualizing temperature, humidity, and rainfall trends.
- **Tech Stack:** Python, scikit-learn, Flask, Pandas, Weather API, HTML, CSS

CERTIFICATIONS

- AWS academy Graduate – AWS Academy Cloud Foundations (2025)
- Data Analytics Basics for Everyone- Edx,(2024)
- Introduction to Generative AI (Google),(2024)

ACHIEVEMENTS

- Solved **100+ problems on Codechef** and **50+ on Leetcode**, strengthening problem-solving and data structures & algorithms proficiency.
