

EDUCATION

Degree/Certificate	Institute/Board	CGPA/Percentage	Year
B.Tech.	Stanley College of Eng. & Tech. for Women	89%	2026
Intermediate	Sai Veda Junior College	91.6%	2022
Secondary	CBSE Board	70%	2020

EXPERIENCE

Intern Trainee
DLRL–DRDO | Oct 2025 – Mar 2026

- Developed a drone identification solution using machine learning techniques for accurate classification of aerial objects.
- Applied computational algorithms and data-driven methods to analyze patterns and improve detection performance.
- Collaborated with engineers to translate project requirements into practical AI-based solutions.
- Assisted in data collection, preprocessing, and validation to support model development.
- Documented methodologies and contributed to technical reports and research deliverables.

Project Trainee
DLRL–DRDO | Mar 2025 – Jun 2025

- Developed an end-to-end audio processing system for noise reduction, speech-to-text, and multilingual translation.
- Implemented audio denoising techniques to enhance speech clarity in noisy environments.
- Integrated speech recognition and translation modules to convert audio into translated text.
- Built a functional pipeline combining preprocessing, model execution, and output generation.
- Documented system workflow and contributed to technical reports under research mentorship.

PROJECTS

- **Remote-Controlled Car**
 - Designed and developed a remote-controlled car using embedded systems and C++ for real-time control.
 - Implemented sensor-based decision logic for obstacle detection and basic autonomous navigation.
 - Integrated AI-inspired control techniques to enhance movement decisions and responsiveness.
 - Developed efficient communication between controller and hardware modules for smooth operation.
 - Tested and optimized system performance for stability, accuracy, and real-time responsiveness.
- **Object Detection System**
 - Developed a web-based object detection system enabling real-time identification of objects from images/video.
 - Integrated TensorFlow.js with the COCO-SSD model to perform real-time object detection directly in the browser.
 - Built an interactive frontend using HTML, CSS, and JavaScript to display detection results with bounding boxes and labels.
 - Implemented real-time object detection using webcam and image inputs, optimizing low-latency in-browser inference without backend dependency.
- **Text-to-Speech Converter**
 - Developed a web-based text-to-speech system to convert text into natural-sounding audio.
 - Integrated Web Speech API for real-time AI-based voice synthesis in the browser.
 - Built an interactive frontend using HTML, CSS, and JavaScript for user input and playback.
 - Implemented voice controls (pitch, rate, language) for customizable audio output.

- Chatbot

- Developed a chatbot using Python to simulate user interaction and provide automated responses.
- Implemented NLP-based text processing for understanding user queries and generating relevant replies.
- Designed conversational logic using rule-based and intent-driven approaches.
- Built and tested the system in PyCharm, ensuring accurate and responsive interactions.

SKILLS

- **Programming & Development:** Python, Java, C, JavaScript, HTML, CSS
- **AI & Machine Learning:** Machine Learning, Deep Learning (CNN), Computer Vision, NLP
- **Databases & Analytics:** NumPy, Pandas, Matplotlib, SQL
- **Frameworks & Tools:** TensorFlow, Keras, OpenCV

CERTIFICATIONS

- Python Fundamentals for Beginners – Great Learning Academy
- Java Programming – Great Learning Academy
- Internship Certification – InternPe

POSITIONS OF RESPONSIBILITY

- Technical Head, Frontend (2023-24)-ACM Student Chapter - Stanley
- Associate President (2023-24)- Street Cause Stanley
- Class representative(2022-25)
