PROJECTS

Skill Swap Platform 2025

Technology: React, Node.js, Express.js, MongoDB

- Developed a full-stack web platform that enables users to exchange skills by connecting learners with mentors, allowing users to create profiles, list skills, and request learning sessions.
- Designed a responsive frontend using React and built RESTful backend APIs with Node.js and Express.js to handle authentication, user management, and skill-based interactions.
- Integrated MongoDB for efficient data storage and implemented secure JWT-based authentication to ensure safe user login and data protection.

Toxic Comment Classifier 2024

Technology: Python, TensorFlow, Scikit-learn, NLP

- Developed an NLP-based machine learning model to automatically detect and classify toxic or abusive comments in online text data.
- Preprocessed large datasets using techniques such as tokenization and text normalization to improve model performance and accuracy.

TECHNICAL SKILLS

- **Programming Languages:** Java, Python, C, SQL, JavaScript
- **Web Technologies:** HTML, CSS, React, Node.js, MongoDB
- **Academic Coursework:** Data Structures, Object-Oriented Programming, DBMS
- **Soft Skills:** Communication, Teamwork, Adaptability, Leadership
